#### Site Visits

Present: Richard Batchelder (Chair), Elizabeth Miller (Vice-Chair), Carroll Brown, Richard Metcalf, Chip Carleton

9:00am: Met at Breck-Plankey Spring. Discussion ensued about whether to put benches or picnic tables in this area and it was agreed that that this is not necessary since Mill Stream Park across the street already has these features. We walked to well head. Mr Brown stated that the plastic cover has been more of a deterrent than the old stone cover and also stated the end of the overflow pipe needs to be located. We then hiked more of the land surrounding the spring.

9:40am: Visited the Carrigan property (Parcel 217-133-001) and met with owners John and April Carrigan to see location of the proposed driveway off Overlook Dr and where the soil scientist took samples. The location of the wetlands do not appear to match the town's overlay.

10:12am: Visited DES owned land off Riverdale St to identify its path to the river.

10:34am: Visited the power plant of the historical Bristol Upper Dam on Lake Street. Mr Brown shared some history of the site.

10:37 Meeting adjourned.
